You can paint on locations that overlap - so the brush will automatically see where the image is another color, and apply the selected color there. If you are a Photoshop user then you will be comfortable with this tool immediately. It allows you to see and edit the layers of your image. There are two buttons: one to open the layers panel which shows the layers you have in your document and another to apply a layer mask if you are using one. The layers panel is how you move, edit, remove, or duplicate them. Layer masks is how you apply opaque and transparent images for more customized texture.
